

Statement of Performance.

Mostostal Pomorze S.A., has as a subcontractor to Mostostal-Chojnice S.A., fabricated 7 steel structure sections for the Sevan Marine SM 452 Drilling Module.

Total tonnage for sections in question is estimated to approx. 130 Tons.

Character of work was normal steel structure fabrication according to relevant Norsok standards with areas of high design categories with difficult access complexity for welding.

Mostostal Pomorze S.A proved to be a very dependable fabrication company with a very positive approach to all difficulties occurred during project.
They fulfilled their obligations within fabrication quality, progress and HSE performance to AS Nymo's fully satisfaction.
